

x86 Software Reverse-Engineering, Cracking, and Counter-Measures

Lab: Logic Flows in IDA – Part 3

if_and

```
#include <stdio.h>

int main(int argc, char* argv[])
{
    if (argc >= 3 && argc <= 8)
    {
        printf("valid number of args\n");
    }

    return 0;
}
```
